Advancing the Mission
Of Better Outdoor Living

Global Vision

YARDCOM, headquartered in New Jersey, USA, originated from SYLVANIX, a renowned outdoor lifestyle brand with deep roots in the global market. YARDCOM has been dedicated to leading the outdoor lifestyle industry since its establishment. Committed to sustainability, we provide eco-friendly outdoor products designed for courtyard owners seeking to expand their outdoor spaces and embrace the beauty of life outdoors. Driven by thoughtful design, we strive to meet the diverse functional, emotional, and social needs of users in outdoor spaces, bringing the beauty of outdoor living to families around the world.

2014

Sylvanix Outdoor Products Inc. was founded in the United States, delivering high-quality outdoor products tailored to the global market.

2020

Expanded into over 30 countries and regions worldwide, delivering high-quality, eco-friendly outdoor products to global markets. Continuously advancing the future of outdoor living and fostering a sustainable global circular ecosystem.

2023

Launched the global high-end outdoor living brand YARDCOM. Dedicated to crafting holistic outdoor solutions and spearheading the evolution of the global outdoor lifestyle.

2024

Milan Design Week - Launch of the artwork "Pan Yuan: Momentality Unfold". In collaboration with designer Wu Bin, exploring a vision of harmonious coexistence between humanity and nature.

2025

Grand opening of the World's First YARDCOM Outdoor Art & Living Space. Strategic partnerships formed with leading international design firms. SAOTA | OKHA | Boeri. Debut at Maison&Objet Hong Kong.

2026

YARDCOM debuts at the Salone del Mobile in Milan.

Bring life's beauty into the courtyard
Marking the outdoors your second home

Global Outdoor Art
& Living Showroom

Yardcom's Global Outdoor Art&Living Showroom, designed by renowned designer Wu bin. As our first outdoor lifestyle gallery, it sets the standard for luxury outdoor living. By blending nature into everyday life, comfort with elegance, and indoor with outdoor spaces, it redefines modern outdoor living.

Discover Luxury
Outdoor Living

Milan Design Week

During Milan Design Week in April 2024 , the institute and the W. DESIGN studio collaborated to create a unique venue with an Eastern atmosphere on the central courtyard of the University of Milan in Italy, called "Panyuan". It not only integrates the concept of coexistence between humans and nature, but also demonstrates the creative combination of modern design and Eastern artistic conception, which is a perfect interpretation of the "ideal outdoor living space" that the courtyard has always adhered to and advocated.

Our State-of-the-Art Manufacturing Hub

Yardcom is backed by a powerful manufacturing base located in Ningbo, China. Over 70,000 square meters, this state of the art facility is designed to offer exceptional supply chain advantages. Achieving a high level of automation with 90% of production processes fully automated, we ensure efficiency, precision, and consistency throughout production. The facility is equipped with advanced machinery, including ten cutting-edge granulation machines with precise control systems, and an annual production value exceeding \$ 115 million.

Our quality control engineers oversee every step of production, from raw materials to final shipment, ensuring strict adherence to internal standards and client requirements. With robust manufacturing capabilities and meticulous quality assurance, our production base is equipped to meet the evolving demands of the global outdoor products market.

The factory's streamlined workflow includes automated material handling, strict moisture control (below 1%, exceeding industry standards), and seamless integration of storage and extrusion processes, ensuring product consistency and stability at every stage. Our high-capacity storage, flexible packaging solutions, and efficient logistics enable us to meet diverse client demands while maintaining top-tier product quality.

U.S. & China Dual R&D Centers: Leading the Industry with Expertise and Excellence

R&D Strength

A world-class R&D team for wood-plastic industry products has been established, with dual R&D centers in the United States and China focusing on cutting-edge technology exploration, product innovation development, and consumer research. The U.S. R&D center is located in New Jersey, with nearly 20 distribution warehouses built on the east and west coast to meet sales requirements throughout the United States and Canada.

Accredited Certificates

Every year, millions of R&D funds are invested to overcome technological barriers, and more than 150 QC tests and independent intellectual property certifications have been obtained so far. We have multiple international ISO system certifications, FSC certifications, EU ROHS, REACH, US ICCES, GRS global recycling standards, EPD environmental product certifications, LCMP low-carbon manufacturing, and other related globally renowned system certifications.

Note: The above data are part of the experimental test data of YARDCOM.

YARDCOM is dedicated to the research of aesthetic materials, aiming to integrate nature, emotion, culture, and technology through the medium of "materials." It transforms outdoor spaces from accessory of the home into a "second nature" that nurtures the spiritual life, social interactions, and cultural identity of urban dwellers.

Excellent performance,
Environmental protection
and sustainability

Natural Texture

With a super realistic, natural wood appearance and warm touch, the Yardcom Sunshine Wood decking can maintain its best condition and texture no matter how long the rainy season, cold winter ice, and snow, or scorching heat and sun. Through unique patented technology and formula in the industry, the product has a longer lifespan and easier maintenance. With just a simple rinse, it can achieve a long-lasting high-end appearance.

Excellent Performance

360 ° cross-section fully covered structure, self-developed double-sided dual color. Excellent craftsmanship, extreme wood-like grain color, woody surface, and soft touch. Mild scratches can be repaired, and as the surface is frequently scratched, its elastic and visual effects achieve a self-repairing function for scratches, without worrying about being scratched by friction.

Environmental Sustainability

Yardcom always focuses on the sustainable development of ecology, using renewable resources to achieve 100% recycling of all materials, with 80% of raw materials coming from renewable resources. Each ton of Sunshine Wood can reduce wood consumption by 5 square meters, contributing to the protection of the earth's ecology with FSC Forest Stewardship Council certification.

A Sustainable And Beautiful Outdoor Lifestyle

Global forest issues are becoming more pressing, with shrinking forest areas and increasing degradation. Both the quantity and quality of forest resources are declining. Yardcom is committed to protecting the environment and restoring the balance between nature and humans. We aim to ensure the sustainable use of forest resources and offer high-quality, beautiful outdoor living solutions.

Over 80% Renewable Raw Materials

Yardcom uses over 80% renewable materials, such as recycled wood powder, plant fibers, and plastics processed with advanced high-temperature co-extrusion technology. This eco-conscious approach delivers high-performance, sustainable outdoor products

100% Recyclable End Products

All Yardcom products are made from 100% recyclable materials and have earned FSC and low-carbon certifications across Europe, North America, and Australia. We are committed to sustainability and long-term ecological protection.

Over 25+ Years of Durability

Yardcom products are engineered for longevity, offering exceptional resistance to chemicals, aging, low temperatures, impact, corrosion, and harsh environments. With proper installation and maintenance, their service life can exceed 25 years.

Annual Carbon Emission Reduction of 473,700 Tons

By using renewable and recyclable materials, Yardcom significantly reduces deforestation. Every ton of Yardcom Sunshine wood offsets the CO2 impact of 15m of traditional wood. With 50,000 tons produced annually, this translates to 473,700 tons of CO2 emissions are reduced each year.

01 DECKING SOLUTIONS

As a ground level flooring system, it offers exceptional weather resistance and durability, standing up to moisture and direct sunlight. Even in harsh outdoor conditions, it remains as new as ever. With its realistic natural wood grain and warm texture, it brings you closer to nature and makes it easy to step into a beautiful outdoor lifestyle.

Transcending Nature,
Requiring No Maintenance, Lasting As New

Sunshine Collection

Positioned for high cost-performance and broad compatibility, the Sunshine Collection delivers outdoor spatial solutions through standardized modules. Combining functional practicality with system stability, it serves as a reliable foundation that connects nature with daily living.

ELEMENT SERIES

/SUNSHINE COLLECTION

Main Board

The Element series adheres to a streamlined and practical approach in its design philosophy. It actively strips away non-essential decorative elements and instead focuses on the utmost realization of basic functions. Despite its relatively streamlined specifications and model selection, it fully retains the core material DNA of the brand. Whether it is the composite formulation of the primary flooring material or the aluminum-wood composite process used in the structures, each has undergone rigorous weathering tests to ensure color stability and structural integrity even under the long-term effects of UV radiation, moisture, and temperature fluctuations.

ESSENCE SERIES
Main Board

/SUNSHINE COLLECTION

The Essence series serves as the "gold standard" within the product portfolio, the Essence Series perfectly balancing design aesthetics and engineering practicality. Centered around highly standardized modular components and a mature rapid-installation system, it significantly reduces construction complexity and delivery timelines, ensuring efficient and precise project execution. In terms of cost performance, it avoids the functional limitations of entry-level products while eliminating the premium costs associated with high-end customization. This approach precisely addresses the core market demand for "value for money." With this balanced and pragmatic product positioning, the Essence series has firmly established itself as a mainstream market choice, becoming the preferred solution for most household users and commercial projects to meeting the needs of diverse scenarios.

Skingrain Collection

Positioning at the high-end market, the Skingrain Collection is dedicated to creating an exceptional outdoor living experience. It seamlessly integrates the warm textures of natural materials with cutting-edge composite craftsmanship, achieving a perfect balance between performance and aesthetics. This vividly embodies the design philosophy: "inspired by nature, yet transcending it."

LINEA SERIES

Ventura Oak

Linea series of skingrain collection features 3D texturing that authentically replicates the appearance of premium natural woods like oak and merbau. Natural wood characteristics, including grain patterns, wormholes, and knots are meticulously preserved, creating rich visual depth and clarity. The surface is comfortably resilient with a slight rebound underfoot and exhibits exceptional resistance to scratching and aging. Reinforced with an internal fiberglass skeleton, it achieves a lightweight yet high-strength structure. Ideal for various outdoor flooring applications, it is available in multiple textures and colors combinations to fulfill diverse spatial design aesthetics.

ENRTY SOLUTIONS

A gate is the "facade" of a courtyard, bridging the inner and outer worlds. Unlike traditional iron doors that are prone to rust and exude a cold visual impression, Yardcom gates are "tender outside and tough inside." The natural wood finish outside is more compatible with the whole yard and can withstand the sun and rain. With the support of aluminum inside, they are stable and durable to endure the time and weather.

Open with A More Stylish Gate

Sunshine Collection

A Sustainable Choice Aligned with Nature

Yardcom entrance gates blend the warm touch of natural wood with modern technological protection, preserving the natural rhythm of the wood grain while eliminating the troubles of decay and corrosion. Each gate is a harmonious coexistence of nature and art, adding a touch of warmth and texture to your home, enduring over time, making every step of the way home a fabulous experience.

MICRO-ARCHITECTURE SOLUTIONS

The pavilion is an ideal space to enjoy moments of relaxation in the courtyard, while the pergola can connect different areas of the courtyard and also provides a space for rest with protection from the sun and wind. Yardcom pavilions are made from innovative Diamond Wood, which combines the natural temperature with a firm inner core, and enjoying authentic wood grain texture that restores the original color of wood. Without worrying about the erosion from wind and rain, they possess a natural wood-like texture and anti-aging durability, freeing you from the trouble of maintenance while enhancing comfort and elegance in the courtyard.

Shelter From The Sun And Wind

Sunshine Collection

Positioned for high cost-performance and broad compatibility, the Sunshine Collection delivers outdoor spatial solutions through standardized modules. Combining functional practicality with system stability, it serves as a reliable foundation that connects nature with daily living.

Element Series Louvered Pergola

The aluminum alloy beam of the Yardcom diamond wood pergola is thickened and widened, with super bearing capacity and stronger structure. The surface is painted with Austrian tiger brand powder, ensuring fine texture, warm luster, and strong weather resistance. Combined with the natural wood texture of Yardcom Diamond wood, it brings natural beauty to your life.

GARDEN SCAPE SOLUTIONS

Outdoor garden space systems transcend the simple acts of planting and viewing, they create a silent dialogue between architecture and nature. With YARDCOM's conservatory, landscape pavilion, and herb Pavilion as the medium, these designs seamlessly integrate structure with greenery, cultivating an outdoor space that combines vitality with a sense of tranquil retreat..

Luxury And Durable
A Masterpiece Of Aesthetics

Sunshine Collection

Positioned for high cost-performance and broad compatibility, the Sunshine Collection delivers outdoor spatial solutions through standardized modules. Combining functional practicality with system stability, it serves as a reliable foundation that connects nature with daily living.

Ultra Series Flower Box

YARDCOM Diamond Wood planter features an aluminum alloy frame, finished with a specially treated eco-friendly coating that is meticulously crafted to replicate the natural wood grain and warm touch . Its innovative double-layer structure combines a durable outer shell that is insect-resistant and rot-proof for long-lasting performance, with a removable inner liner that makes soil replacement and planting remarkably clean and convenient. With this design, gardening transforms into an elegant display rather than a labor-intensive task.

Bamboueraie series
Herb Pavilion

The Yardcom Herb Pavilion, designed in collaboration with W. DESIGN, reimagines the beauty of garden herbs through Diamond Wood. Engineered for exceptional resistance to moisture, decay, and cracking while retaining the tactile feel of real wood, it becomes a living garden crafted especially for herbs. In the courtyard, you harvest not only fragrance, but also a new outdoor way of living: cooking with what you grow, and reconnecting with nature, by hand.

Bambouseraie series

Dawn White · Lamp

Model	YDL-JB01
Dimension	633*614*1975mm
Wattage	24V 80W
Material	Polyethylene, Aluminum Alloy
Feature	Integrated Control System, Moblie Dimming Control, App Remote Control, Bluetooth/WiFi Connectivity

Description	Inspired by the graceful silhouette of Song Dynasty plum vases—with broad shoulders and a tapered base—this piece reinterprets classic Eastern form through a contemporary lens. Its surface texture echoes the purity and rustic charm of Joseon white porcelain, capturing the natural traces of fingertips and glaze in the crafting process. Crafted from durable outdoor-grade polymer (PE), it resists sun, wind, and time. A nano-coated finish adds a subtle patina, evoking the touch of age and artistry. The integrated LED source offers adjustable brightness and color temperature, casting a soft, ambient glow to enrich outdoor living with warmth and calm.
-------------	---

Bambouseraie series
Ink · Round Stool

Model	YYD-DM02
Dimension	356*356*400mm
Material	Dupont Stone with high weather resistance
Feature	Crafted from natural stone powder and SGS eco-friendly resin under high pressure

Description	In Eastern culture, ink embodies a quiet, restrained beauty—a reflection of the East's poetic sensibility and appreciation for subtle elegance. Drawing inspiration from the traditional dun (pedestal forms), this piece features layered ink-like blocks that collide in organic rhythm, giving the structure a sense of spontaneous energy and raw vitality. The cinched waistline adds lightness and grace, balancing strength with refinement. Made from high-performance DuPont stone, it is exceptionally durable, weather-resistant, and environmentally conscious—perfect for demanding outdoor settings. The fully enclosed, integrated molding process ensures lasting stability and high load-bearing capacity.

Material	Bionic Outdoor Polyurethane Foam, T6 Grade Aluminum Alloy
Feature	Aluminum Structure, Roman Black Antique Bronze Finsh

Description	Childhood memories of misty rains and droplets cascading from curved eaves evoke the poetic charm of Jiangnan—the water towns of southern China. Inspired by the dougong and sweeping eaves of traditional Chinese architecture, the design team reimagines this serene Eastern mood in a bar chair, blending cultural depth with moments of leisure and ease. Echoing the rhythm of bamboo joints, slender sliced bamboo elements form a lightweight yet supportive seat—offering comfort beyond the typical bar chair, even in midsummer heat. Artful mortise-and-tenon joints, where yang meets yin, reflect the harmony of opposites. This thoughtful integration of classical wisdom and minimalist design captures a quiet poetry—where nature and form find balance.

Bambouseraie series
Bamboo · Single Sofa

Model	YSF-YJ01
Dimension	850*850*705 mm
Material	T6 Aluminum Alloy, Outdoor Saddle Leather, PET, Semi-Outdoor Fabric, PU Outdoor Foam
Feature	Crafted Aluminum Castings, Roman Black Antique Bronze Finsh

Description	During China's Song Dynasty, the couch served as a versatile daybed for rest, reflection, and utility. Inspired by its form, the bamboo series embraces a fluid, modular design that adapts to reclining or seated postures—shaping a relaxed, inviting outdoor space. Bamboo-joint motifs are woven into the structure, symbolizing quiet strength and refined character, echoing the grace and humility of Eastern living. The backrest features a laser-cut saddle leather grid, crafted to resemble handwoven textures. Each piece is hand-stitched to balance softness with durability—where craftsmanship meets comfort and adaptability.

Bambouseraie series
Zither · Dining Table

Model	YZC-JS01
Dimensiont	1200*1200*755 mm
Load Capacity	100kg
Material	HPL Polymeric Material, Aluminum Extrusions Natural Marble, 304 Stainless Steel Base
Feature	Polymeric Hot Pressing Technics, Tiger UV-Resistant Outdoor Coating
Description	The dining table takes inspiration from the ancient Jia Ma woodblock prints of the Bai people in Yunnan—an art form recognized as a National Intangible Cultural Heritage for its distinctive style and deep cultural resonance. The tabletop design translates the textures of mountains, trees, and stones into tactile reliefs, preserving the raw, expressive knife marks of woodcut carving—fostering a closer connection to nature and traditional Eastern artistry. Made from hundreds of layers of natural wood fiber pulp, the surface is fused under high heat and pressure, ensuring exceptional strength and durability for demanding environments. With its naturally warm, skin-friendly texture, the table remains smooth and comforting to the touch across all seasons.

Bambouseraie series
Bamboo · Coffee Table

Model	YZJ-YJ01
Dimension	1715*900*285 mm
Maximum Load Capacity	150KG
Material	HPL Polymer Material, Aluminum Extrusions
Feature	Polymeric Hot Pressing Technics, Roman Antique Bronze Finish

Description	This design draws inspiration from the covered walkways (yanlang) of traditional Chinese courtyards—spaces that embody the harmony between humanity and nature at the heart of classical philosophy. Designer Wu Bin interprets this poetic Eastern spirit through a contemporary lens. The table legs echo the form of bamboo joints, exuding quiet elegance and humility. The tabletop references winding stone paths in classical gardens, where natural seams and shifting patterns create a visual rhythm reminiscent of “a winding path leading to serenity.” Crafted from hundreds of layers of natural wood fiber pulp, the surface is fused under high heat and pressure to ensure durability across seasons—while maintaining a soft, tactile warmth.

Zither · Cane Chair

Model	YYB-JS01
Dimension	780*904*935 mm
Material	Aluminum Alloy, Saddle Leather, Braided Leather Cord
Feature	Outdoor Rattan Weaving Techniques, Ultra high-Pressure Curved Tubing 3D Printing

Description	Renowned for its graceful curves and fluid lines, the Ming and Qing dynasty folding armchair is often likened to a bold brushstroke in an ink painting—an embodiment of Eastern design aesthetics. This piece draws inspiration from the chair's iconic arched back, merging it with the structural rhythm of a guqin' s strings. The result is a harmonious blend of tradition and modernity—imbued with a quiet, rustic charm that reflects a contemplative lifestyle and Eastern philosophy of simplicity. The backrest features premium saddle leather, offering a soft, supple touch and enhanced ergonomic support. Laser-etched textures at the base create a woven-grid visual, balancing comfort, functionality, and refined versatility.

Zither·Side Chair

Model	YYB-JS02
Dimension	575*620*865 mm
Material	Tiger UV-Resistant Outdoor Coating, Aluminum Extrusions
Feature	Outdoor Rattan Weaving Techniques, Ultra high-Pressure Curved Tubing 3D Printing

Description	Inspired by the curved backrest of Ming and Qing dynasty armchairs, this dining chair blends classical form with contemporary aesthetics and innovative weaving techniques. Its silhouette is poised and refined, with smooth, flowing lines that reflect meticulous craftsmanship and the quiet elegance of Eastern design. More than just a seat, it embodies the evolving lineage of Chinese cultural expression. The cushion is crafted from weather-resistant mountaineering rope—durable against wind and rain—yet handwoven for even support, offering both comfort and breathability in all outdoor conditions.

Sunshine collection

Great outdoor living requires no maintenance

To relax on the patio and enjoy the sunshine, you need this comfortable Yardcom chair. The high-performance materials make it healthier and more durable than ordinary chairs, and will last as the new despite exposure to the sun and rain. Not only good for private gardens and terraces, but also good for various spaces like swimming pools and beaches.

Essence Series

Adirondack Chair Shell

Our design takes strength into account with lightweight design, possessing with brighter color, denser texture, and better performance. The density of the product is about 0.78g/cm³, and the color is durable and not easy to fade after 2000 hours of artificial accelerated aging test. Excellent material performance, acid and alkali resistance, and conventional chemicals, The surface of the product has a dense layer, high impact resistance, and pressure resistance than conventional foam products. The product adopts "closed cell foam" process, with uniform foaming and good mechanical performance, and has better resistance to repeated disturbance in terms of screw force, without local weaknesses. The product is anti-mold, anti-fungal, good dirt resistance, easy to clean, and easy to maintain.

**High weatherability**
Not affected by bad weather, sun or rain

**Low maintenance**
Anti-termite, anti-mold and anti-fungus, clean in simple way

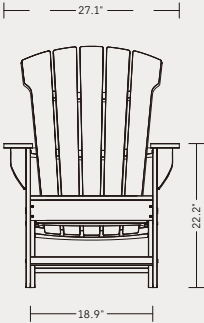

**2000 hours test**
Rigorous sampling and testing, no fading or aging

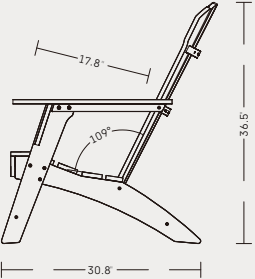

**Anti-corrosion**
Better chemical stability and is resistant to acid and alkali chemical corrosion

**Kid-friendly**
Exclude PVC, BPA, BPS, BPF, BFDG, safe to children

**Green and recyclable**
100% recycled and recyclable material used

**Closed cell foaming process**
Density up to 0.78g/cm³, uniform load-bearing, more impact-resistant and pressure-resistant

OUTDOOR LIFESTYLE

Yardcom focuses on outdoor lifestyle, creating various outdoor spaces and offering five comprehensive solutions for outdoor living space.

Socializing Space

Without losing the warmth and comfort of the interior, you can chat with friends and guests in this socializing area that is full of green, enjoy the flowers and scenery with your family and spend quiet time away from the hustle and bustle to encounter beautiful life unexpectedly between nature and breeze.

Catering Space

Connecting indoor lifestyle with nature, dining is no longer limited to indoor spaces. It can create a whole new outdoor dining experience in a relaxed, poetic atmosphere. With your family or friends, you can enjoy a drink, chat, food tasting, and the delectation of your leisure time.

Gardening Space

Getting away from the hustle and bustle of the city, you can feel the outdoor beauty. In this picturesque scenery, you can explore the tranquility and romance of nature and witness the beauty and grace of the seasons. Here, it seems you can hear the whispers of the breeze and feel the breath of the earth. Time seems to slow down, immersing oneself in peace and harmony.

Exercising Space

Find a quiet place and start a yoga journey in harmony with nature to completely relax your body and mind away from the busy urban life. With the sun shining and the breeze blowing gently, feel the fresh air flowing through your body with every breath, let go of the fatigue and tediousness of life, talk to nature, and listen to the voice of your heart.

Global Projects

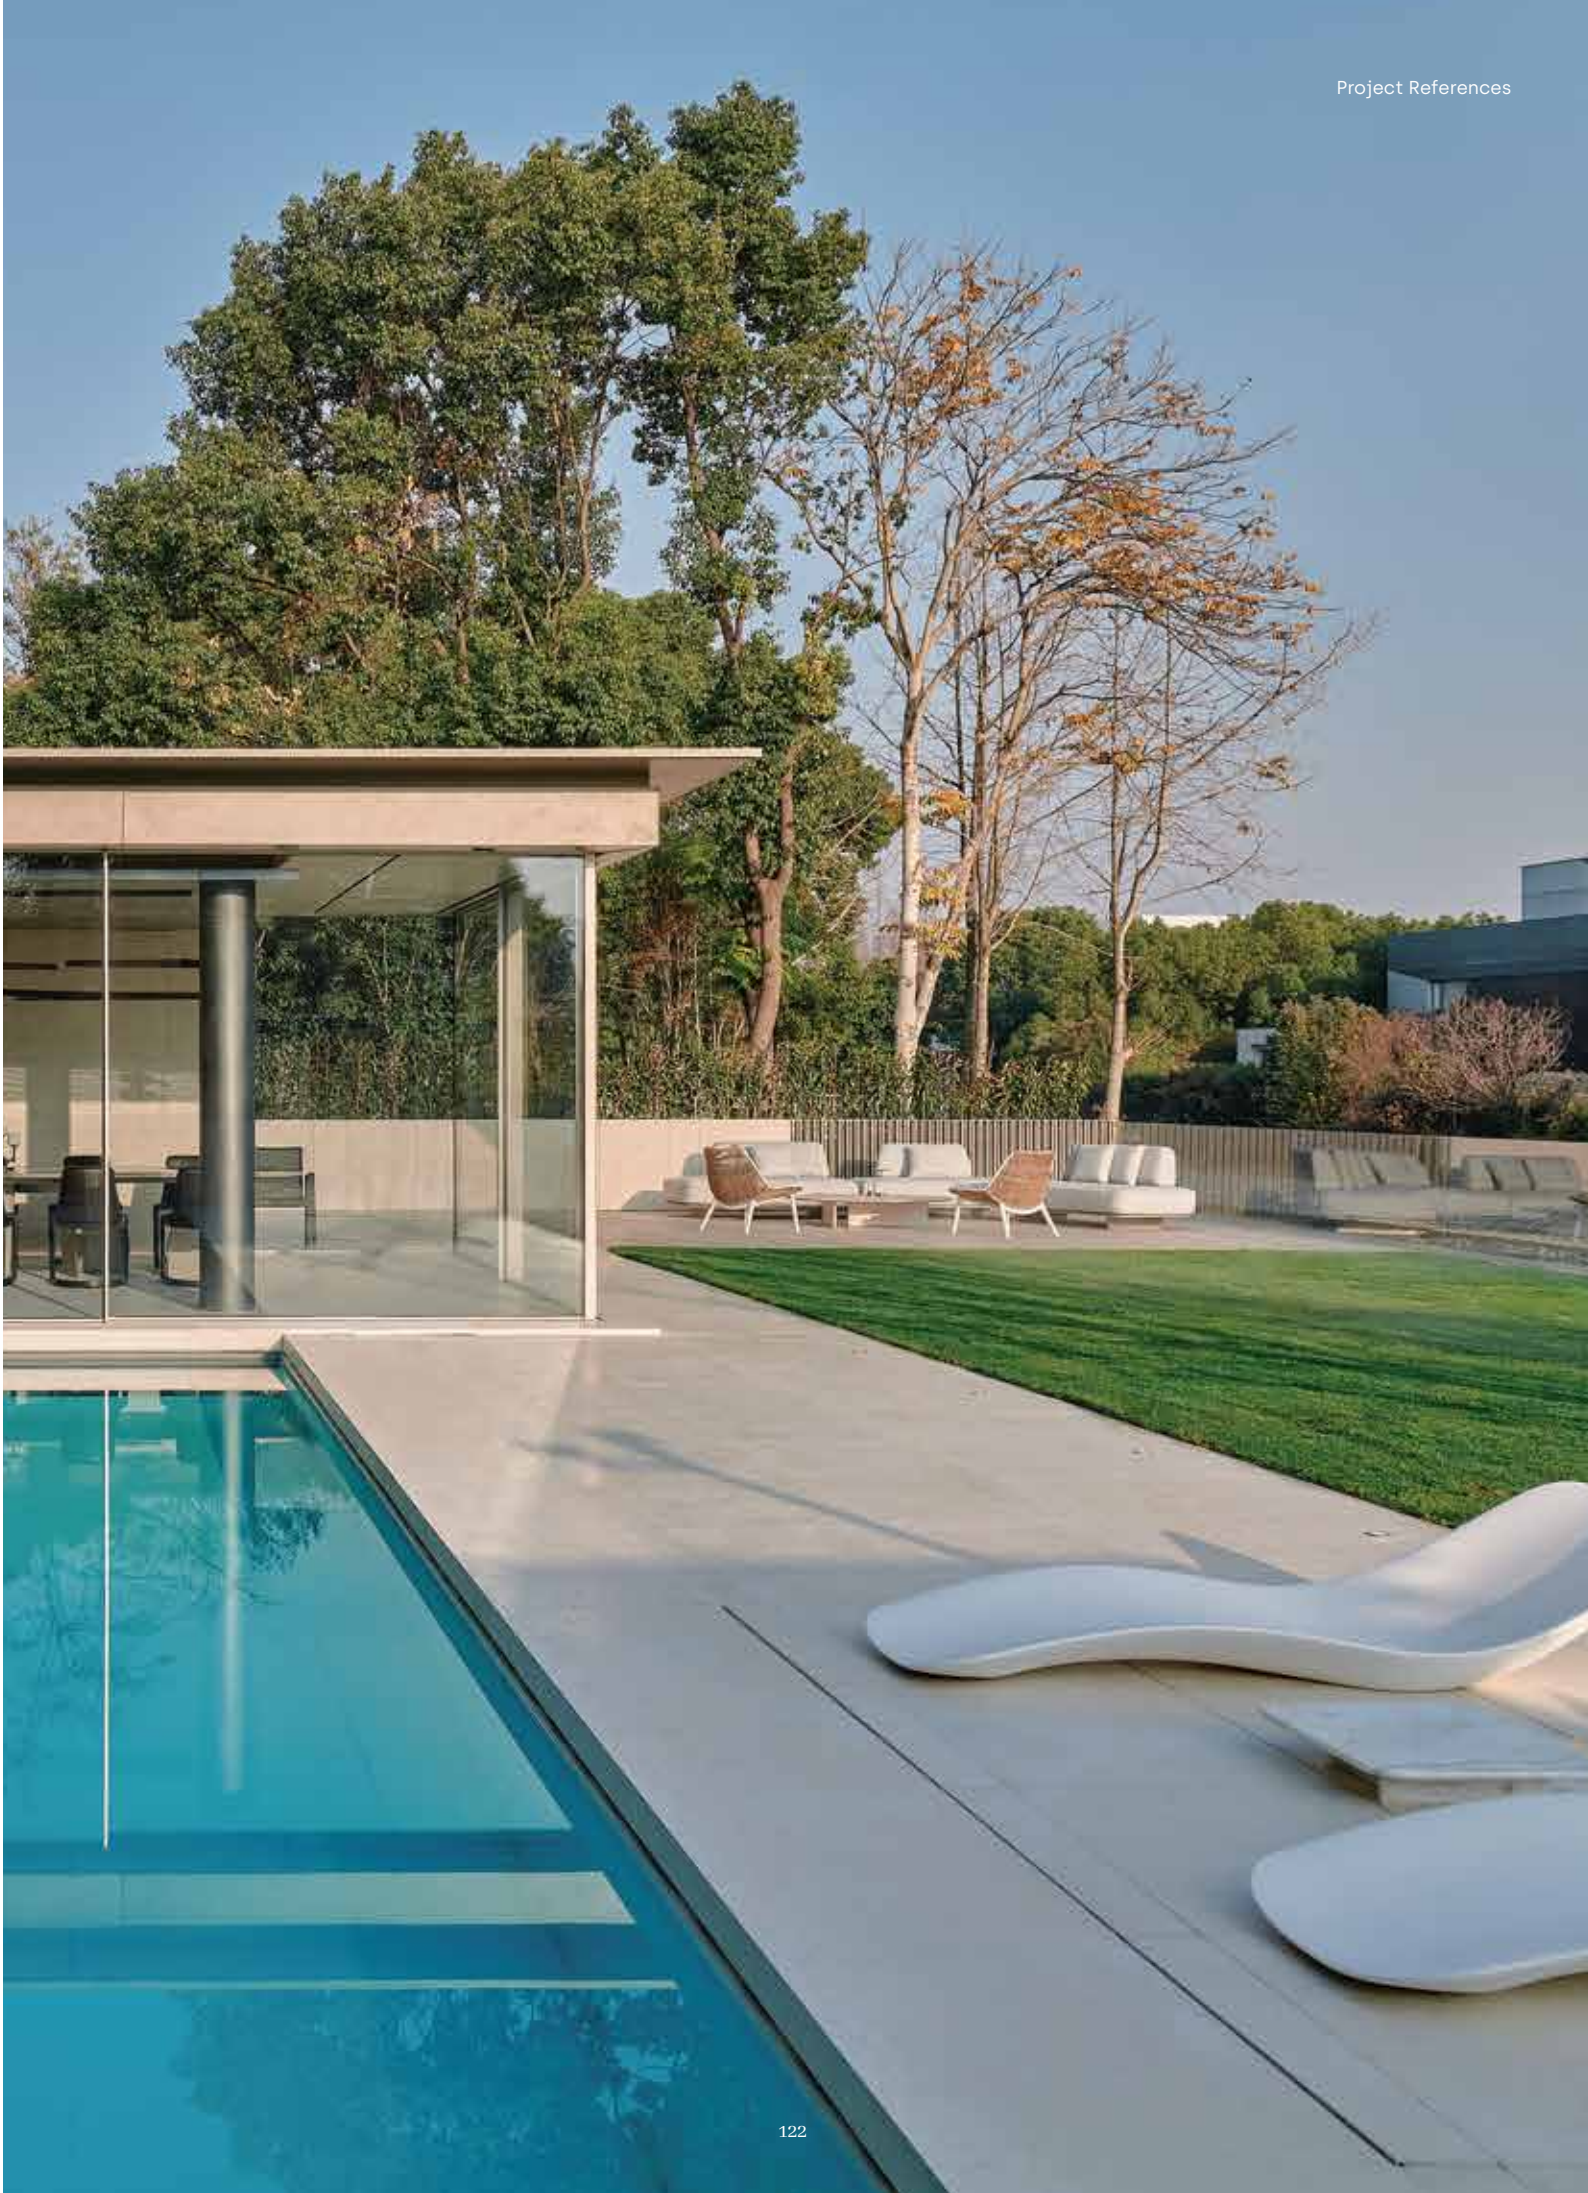

Multiple installation combinations, supplemented by professional accessories, can meet various application scenarios.

For Your Better Outdoor Living

We are dedicated to creating exceptional outdoor living spaces with outstanding design and thoughtful service. For Yardcom, the courtyard isn't just an extension of your home—it's a place where nature and living come together in harmony. By blending nature, art, and social connection, we hope to make the courtyard a place for special moments of your life, bringing families closer and offering a sense of peace and inspiration.
